

PDF file to accompany the marcomathieumedia website as a navigation aid.

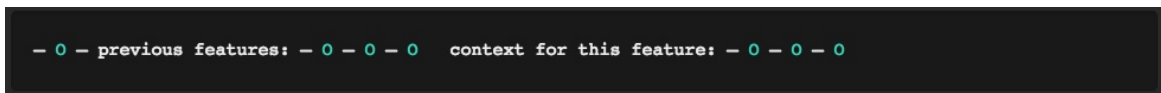

Most of the site navigation we hope is somewhat intuitive, however here are a few tips and clarifications just in case.

1. Feature videos and their related context

As soon as a user lands on the home or front page, the **latest feature** video is displayed as a full-page item.

Previous features videos are available using the selection bar below the video (— ○ — ○ — ○)

The — ○ — to the left of the bar, or the menu item “**latest feature**” will always bring you back to the latest feature screen available.

Whichever feature is selected will have a series of options labeled “**context for this feature**”.

These are links to other pages or posts which provide a context / more information / a back-story / etc, for the selected featured video.

Return to the chosen feature video page by the menu item, “**latest feature**” and then the “**previous feature**” choice you made before.

Tip:

Whenever you hover your mouse pointer over one of the selection circles, you will see the web link in the bottom left corner of your web screen - this might help you to choose the link to select.
